📍 Nantes, France

🚀 10 years in Product

🎯 Open to Senior / Lead PM roles · B2B SaaS · Nantes, hybrid or remote

Senior Product Manager, **10 years in product**, in **B2B SaaS** (AB Tasty, Everysens) and enterprise settings (SNCF Connect & Tech), **engineer by training**. My specialty: **growth** for SaaS products, from onboarding to self-serve monetization. At AB Tasty, I lead the shift from a Sales-Led to a **hybrid model**: business case and roadmap with leadership, two PMs led, a self-serve funnel shipped behind a feature flag. I decide with data (**SQL, Metabase, Mixpanel**) as much as with user interviews.

**+15%**

Activation rate (AB Tasty)

**-50%**

Entry time (Everysens)

**+100%**

Conversion rate, ticket  
retrieval (SNCF Connect)

## 🔄 What defines me

### Problem first

**No feature without a quantified user problem.**

- Discovery every week: interviews and user tests.
- When interviews are impossible, in a station in the middle of an epidemic, I go get the signal elsewhere: a daily extraction of tweets.

### Data decides

**Intuition starts the test, data validates it.**

- I build my own dashboards: churn, retention, activation, Time-to-Value.
- An external benchmark before investing: that's what showed our activation was falling behind.

### Small first, then big

**Continuous learning on the way to Product-Market Fit.**

- A "Fail Fast" culture with short delivery cycles.
- Delivery in steps rather than a big bang, and progressive rollout when the risk is high.

### Leadership

**PMs and teams to move forward, a course held with leadership.**

- Two PMs led on AB Tasty's self-serve workflow: splitting the plan, scoping trade-offs.
- A Product Management community of 100+ people at SNCF, mentoring 2 to 3 people.
- Business case and roadmap carried to leadership; squads of up to 15 developers.

AB Tasty

Nantes, France

TOTAL  
3 years

Senior Growth Product Manager

May 2025 — Present · 1 year 4 months

Mission: open the platform to self-serve alongside enterprise sales, within AB Tasty's Growth pillar (Experience Optimization SaaS: A/B Testing, Personalization). International team, English as the working language.

KEY ACHIEVEMENTS

- Self-serve funnel shipped to production behind a feature flag, ready to launch: public sign-up, limited freemium, Hyperline billing scoped end to end (payments, subscriptions, feature access by plan). Launch put on hold after AB Tasty's merger with VWO.
- Business case and roadmap for the hybrid model carried to leadership: moving from a 100% Sales-Led model to one where large accounts stay with Sales and everyone else signs up and pays on their own.
- Led 2 Product Managers on the workstream: splitting the plan, scoping trade-offs, overall consistency.

 Methodology — Scrum
  Team — 4 developers, 1 tech lead, 1 QA, 1 Product Designer

Product Manager

Sep 2023 — May 2025 · 1 year 8 months

Mission: the "Product eXperience" of the Experience Optimization platform (A/B Testing, Personalization): onboarding, activation, retention.

KEY ACHIEVEMENTS

- +15% activation rate, -20% Time-to-Value: reworked onboarding with a user qualification engine and a new activation journey.
- Mandatory 2FA rolled out to 100% of the user base in successive waves, paced so Customer Success Managers could support their clients: no activity loss, near-zero support impact.
- Churn, retention, activation and Time-to-Value tracked automatically: built the product data infrastructure (SQL, Metabase, Mixpanel).
- Product vision refocused on retention and engagement: "Make our users fall in love with our product, repeatedly".

 Methodology — Scrum
  Team — 3 developers, 1 tech lead, 1 QA, 1 Product Designer

## Everydens

Nantes, France

### Product Manager

Apr 2022 — Sep 2023 · 1 year 5 months

Mission: the "Execution" module (waybills, trains of 30+ wagons) of a SaaS platform for managing and tracking rail freight, serving the modal shift from road to rail. English as the working language with the team.

#### KEY ACHIEVEMENTS

- ❑ **-50% entry time, +20% user satisfaction:** technical and functional rework of the entry module, secured with leadership and delivered incrementally, **MVP shipped in under 2 months.**
- ❑ **User adoption and data reliability as the module roadmap's priorities:** transport entry, waybill validation, real-time tracking.
- ❑ **User research and UI/UX mockups done on my own** (Hotjar, Heap) before a Product Designer joined the team.

🔗 **Methodology** — Scrum 👥 **Team** — 4 developers, 1 QA, later 1 Product Designer

## SNCF Connect & Tech

Nantes, France

TOTAL

7 years 3 months

### Product Manager

Oct 2021 — Apr 2022 · 6 months

Mission: the Prêt à Voyager health-pass platform (pretavoyager.sncf.com, now decommissioned), up to **40,000 visitors a day**, where travelers self-checked their health pass and train ticket during Covid-19. In parallel with the online-stores role.

#### KEY ACHIEVEMENTS

- ❑ **+100% conversion rate** on the first step of ticket retrieval: journey reworked from traveler feedback collected on Twitter (daily extraction via Zapier).
- ❑ **Platform rebuilt in-house** after a first outsourced version, to smooth station boarding.

🔗 **Methodology** — Kanban 👥 **Team** — 4 developers, 1 Engineering Manager

### Product Manager

Sep 2020 — Apr 2022 · 1 year 7 months

Mission: the online store generator for transport tickets, for two clients: Transilien (boutique.transilien.com) and TER (smart-card ordering). From October 2021 to April 2022, in parallel with the Prêt à Voyager role.

#### KEY ACHIEVEMENTS

- ❑ **A shared product mission and vision** for stakeholders and the marketing team, formalized and communicated.
- ❑ **2021 strategy held by OKRs:** delivery roadmap, backlog prioritization, User Stories.
- ❑ **Discovery relaunched:** user surveys, mining the available data.

🔗 **Methodology** — Scrum 👥 **Team** — 3 developers, 1 Scrum Master, 1 Delivery Manager

### Product Management Community Lead

Apr 2019 — Feb 2020 · 10 months

Led the company's Product Management community of practice, **100+ people**, alongside the Product Manager role.

#### KEY ACHIEVEMENTS

- ❑ Shared Product Management practice insights and ran the community's sessions.
- ❑ Workshops and exercises to help the community grow.

- ☐ Mentored 2 to 3 people throughout the term.

### Junior Product Manager

Aug 2016 — Sep 2020 · 4 years 1 month

First the digitalization of B2B group-ticket sales (SNCF sales staff, travel agencies), then the distribution web services (APIs) behind regional (TER) and urban ticket sales, used by the sales channels.

#### KEY ACHIEVEMENTS

- ☐ Ran needs-gathering workshops and high-level sizing of requests from business teams, maintained the roadmap and Story Mapping.
- ☐ Wrote User Stories and associated BDD scenarios, ran Sprint Plannings.
- ☐ Defined the solution in coordination with partner projects, provided functional support to the development team and validated delivered features.

🔗 **Methodology** — Scrum

👥 **Team** — Up to 15 developers, 2 Product Managers, 1 QA, 1 Scrum Master, 1 Delivery Manager

### QA

Jan 2015 — Aug 2016 · 1 year 7 months

Ran and wrote test campaigns for Thalys web and mobile ticket-booking applications and a B2B enterprise portal.

#### KEY ACHIEVEMENTS

- ☐ Led testing on the first phase of the group-ticket sales digitalization project, on the consumer side.
- ☐ Took part in agile ceremonies and provided functional support on select User Stories.

🔗 **Methodology** — Scrum    👥 **Team** — 4 developers, 1 Product Manager

## Eurogiciel · Sigma Informatique · Virage Group

Nantes, France

### Java developer, then functional analyst (IT consulting)

Feb 2011 — Jan 2015 · 3 years 11 months

Four years on the technical side before moving into Product Management.

#### KEY ACHIEVEMENTS

- ☐ Development (Java), functional analysis and specification writing for clients such as Thales Alenia Space and several major retail chains (Gileco / E.Leclerc group).
- ☐ Project management (planning, dashboards) and QA/testing.

🔗 **Methodology** — V-Model, Scrum    👥 **Team** — Up to 5 people depending on the engagement

#### AB Tasty — Fundamentals Certificate

Internal certification on mastering the AB Tasty platform (Experience Optimization: A/B Testing, Personalization).

### LINKEDIN RECOMMENDATION

*“Antoine is a caring, committed and demanding product manager, driven by real enthusiasm. He knows how to structure his team's collaboration time intelligently and loves bringing out the best in each person. I can only recommend him to strengthen an ambitious, collaborative team.”*

#### Alix Paoli

CX Designer at Decathlon · Former colleague at AB Tasty

## Side projects

### Tour de Growth

A free growth check-up tool (AARRR framework), designed and launched to size up a growth strategy in three minutes. In plain language rather than jargon, it shows where it already holds up and where it doesn't yet. The in-depth mode runs on the Gemini API; the product was designed and built with Claude Code.
